Highbright 0603 ChipLED

DESCRIPTION
The new ChipLED series have been designed in the smallest SMD package. This innovative ChipLED technology opens the way to:
• smaller products of higher performance
• more design-in flexibility
• enhanced applications

The 0603 LED is an obvious solution for small-scale, high brightness products that are expected to work reliably in an arduous environment.

PRODUCT GROUP AND PACKAGE DATA
• Product group: LED
• Package: SMD 0603 ChipLED
• Product series: power
• Angle of half intensity: ± 73°

FEATURES
• Super thin ChipLED with exceptional brightness
  1.6 mm x 0.8 mm x 0.55 mm (L x W x H)
• High reliability PCB based
• Wavelength typ. 525 nm (true green)
• InGaN technology
• Viewing angle: extremely wide 146°
• Grouping parameter: luminous intensity, dominant wavelength, and forward voltage
• Available in 8 mm tape on 7" diameter reel
• Compatible to IR reflow soldering
• Preconditioning according to JEDEC® level 2a
• Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

APPLICATIONS
• Wearables
• Backlight keypads
• Navigation systems
• Cellular phone displays
• Displays for industrial control systems
• Miniaturized color effects
• Traffic displays
• Heart rate monitoring

Note

• Luminous intensity is tested at a current pulse duration of 25 ms and an accuracy of ± 15%.

The above type numbers represent the order groups which include only a few brightness groups. Only one group will be shipped on each reel (there will be no mixing of two groups on each reel). In order to ensure availability, single brightness groups will not be orderable.

In a similar manner for colors where wavelength groups are measured and binned, single wavelength groups will be shipped in any one reel.

In order to ensure availability, single wavelength groups will not be orderable. Also single forward voltage groups are not orderable.

L. Halogen-free symbol
M. RoHS symbol

DRY PACKING

The reel is packed in an anti-humidity bag to protect the devices from absorbing moisture during transportation and storage.

FINAL PACKING

The sealed reel is packed into a cardboard box. A secondary cardboard box is used for shipping purposes.

RECOMMENDED METHOD OF STORAGE

Dry box storage is recommended as soon as the aluminum bag has been opened to prevent moisture absorption. The following conditions should be observed, if dry boxes are not available:

- Storage temperature 10 °C to 30 °C
- Storage humidity ≤ 60 % RH max.

After more than 672 h under these conditions moisture content will be too high for reflow soldering.

In case of moisture absorption, the devices will recover to the former condition by drying under the following condition:

192 h at 40 °C + 5 °C / - 0 °C and < 5 % RH (dry air / nitrogen) or
96 h at 60 °C + 5 °C and < 5 % RH for all device containers or
24 h at 100 °C + 5 °C not suitable for reel or tubes.

An EIA JEDEC standard JESD22-A112 level 2a label is included on all dry bags.

Example of JESD22-A112 level 2a label

1. Shelf life in sealed bag 12 months at <40°C and < 90% relative humidity (RH)
2. After this bag is opened devices that will be subjected to infrared reflow, vapor-phase reflow, or equivalent processing (peak package body temp. 260°C) must be:
   a) Mounted within 672 hours at factory condition of <30°C/60%RH or
   b) Stored at <20% RH.
3. Devices require baking before mounting if:
   a) Humidity Indicator Card is >10% when read at 23°C +5°C or
   b) 2a or 2b is not met.
4. If baking is required, devices may be baked for:
   192 hours at 40°C + 5°C/5°C and <5%RH (dry air/nitrogen) or
   96 hours at 60±5°C and <5%RH For all device containers or
   24 hours at 100±5°C Not suitable for reels or tubes

Bag Seal Date: ______________________________
(IF blank, see bar code label)

Note: LEVEL defined by EIA JEDEC Standard JESD22-A112
**ESD PRECAUTION**

Proper storage and handling procedures should be followed to prevent ESD damage to the devices especially when they are removed from the antistatic shielding bag. Electrostatic sensitive devices warning labels are on the packaging.

**VISHAY SEMICONDUCTORS STANDARD BAR CODE LABELS**

The Vishay Semiconductors standard bar code labels are printed at final packing areas. The labels are on each packing unit and contain Vishay Semiconductors specific data.
Disclaimer
