Standard 124-pin TQFP card with PIC32MZ2048ECH MCU
What's on Card

**1. PIC32MZ2048ECH124 microcontroller.** Featuring microAptiv DSP-enhanced core, it has up to 330 DMIPS operation, 2048KB of program memory, 512 KB RAM, and lots of internal modules.

**2. 8 MHz crystal.** We carefully chose the most convenient crystal value that provides clock frequency which can be used directly, or with the PLL multipliers and dividers to create higher MCU clock value.

**3. 32.768 MHz oscillator.** MCU card also contains 32.768 KHz crystal oscillator which provides external clock for the RTC module.

**4. Ethernet transceiver.** MCU card contains single-chip Ethernet physical (PHY) layer transceiver which provides additional Ethernet functionality to the microcontroller.
